

## Instructions for Downloading GABI Disk by Disk

1. Click on Disk 1.
2. Select 'Save to Disk.'
3. Select the location you wish to save the files to. You may want to save it to your C:/ drive in the root directory.  
  
Be patient. Downloading software from the internet takes time.
4. Repeat steps 1-3 for Disk 2 through Disk 6.
5. Once the downloads are complete, use Windows Explorer or My Computer to find the files. There should be 6 GABI zip files in that folder or in the root directory of your C drive. They will be called GABI\_Install\_Disks#.
6. Double click on each file and unzip to the default directory (C:\GABI INSTALL by disk). Then click on the unzip button. Do this for each of the 6 files.
7. Use Windows Explorer or My Computer to enter the C:/GABI INSTALL by Disk. In that folder, you should see another folder named Disk 1.
7. Open the Disk 1 folder and double-click on Setup.exe. (Note: There will be several files called Setup but only one is an executable. If you select View > Details, it is the one labeled 'Application.' The icon looks like a computer monitor.)
8. Installation will begin automatically. Use the defaults supplied by the program.
9. Once the installation is complete, you can open the program from your START button in the bottom left corner of your screen. Select START > Programs > GABI > GABI.
